PROFILE

Customer-focused technical problem solver combining operational leadership and consultative discovery with hands-on development of business automations, desktop tools, and workflow systems. Promoted to Assistant Manager at Derand Motorsports and ranked among Neo Financial's top 10 sales performers nationally. Experienced in diagnosing technical friction, defining user requirements, and implementing practical automations that improve accuracy, turnaround times, and team workflows.

TECHNICAL SOLUTIONS & AUTOMATION

Quoridor Multiplayer PWA

Live deployed web application | Flutter 3.35, Firebase Firestore, Dart BFS Graph

Architected turn-based strategy board game featuring custom 3D Matrix4 perspective engine, real-time Cloud Firestore synchronization, BFS graph validation preventing deadlocks, and guest matchmaking with instant room codes.

Auto Calendar Printer

Working internal automation | Google Apps Script, PDF generation, email

Automated conversion of delivery schedules into formatted single-day and two-week calendar PDFs, skipping empty views and distributing schedules to operations teams via automated email.

Bike Finder & Spec Sheet Maker

Working internal tools | Python, Flask, Streamlit, PDF processing, Excel

Built document-indexing and processing tools to parse product PDF directories, extract model specifications into structured Excel catalogs, and generate standardized spec sheets from PDF templates.
